DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1,2,6,7 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Limansky et al.

Limansky et al. discloses the claimed invention, including an extruded elongate base including base flanges, and an elongate insert including a metal trim layer. The insert includes flanges/legs.

Re "being formed", Such is method of making, carrying no weight in an apparatus claim.

Re "configured to engage" is intended use, carrying little weight in the claim. The projecting flanges/legs of Limansky et al. are positioned such that engagement is possible.

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 1-4,7,11,12-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kessler in view of Limansky et al.

Kessler discloses the coiling of base and insert, but fails to disclose attachment to a boat, nor a decorative metal element.

Limansky et al. is discussed above, and further teaches the heating of the base layer to provide required flexibility.

It would have been obvious to one of ordinary skill in the art at the time of the invention to mount the rub rail of Kessler upon a boat as taught by Limansky et al.

Such a combination would have been desirable at the time the invention was made so as to provide protection of the hull.

It would further have been obvious to one of ordinary skill in the art at the time of the invention to provide a decorative metal insert to the rub rail of Kessler as taught by Limansky et al.

Such a combination would have been desirable at the time the invention was made so as to provide a pleasing appearance.

Re claim 18, since a long coil of product is supplied, the length of the pieces applied to the hull is considered to have been an obvious design consideration.

Re claims 13 and 14, the material characteristics employed are considered to have been an obvious design consideration.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Boyer discloses a rub rail for a boat.

Art Unit: 3617

6. Claims 5,8 and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
